Professional Profile

Network Specialist and Full-Stack Developer with 6+ years of experience in designing, implementing, and managing complex IT infrastructures while developing efficient web solutions. Expertise spans network security, virtualization, and full-stack development with proven results in optimizing systems and creating user-centric applications.

Technical Expertise

Networking:

- Advanced: Fortinet/Sophos Firewalls, VoIP, LAN/WAN, VPN, Virtualization (VMware/Hyper-V), SAN Storage
- Intermediate: Routing & Switching, DNS/DHCP, Server Management

Development:

- Frontend: HTML5, CSS3, JavaScript, WordPress
- Backend: Python, PHP
- Databases: SQL Server

Systems & Tools:

- Windows Server, Active Directory, IIS, ManageEngine
- Development Tools: Visual Studio

Professional Experience

Senior Network Engineer & Developer

Depoint, Tehran | June 2023 – Present

- Designed and implemented a secure VoIP system, reducing communication costs by 30%
- Optimized network performance, achieving 99.9% uptime through strategic firewall (Fortinet/Sophos) and VPN configurations
- Developed internal web portals using Python and JavaScript, improving workflow efficiency by 35%
- Led UX/UI improvements for company websites, increasing mobile engagement by 40%

IT Manager & Developer

Paytakht Medical Imaging Center, Tehran | June 2017 – May 2023

- Virtualized 80% of servers (VMware/Hyper-V), reducing hardware costs by \$15K annually
- Implemented disaster recovery plans that decreased potential downtime by 50%
- Built patient management tools using Python/SQL, cutting data retrieval time in half
- Maintained and secured network infrastructure, preventing 100+ potential breaches annually

Education & Certifications

Bachelor's in Computer Engineering (Software)

Mazandaran University of Science and Technology | 2014

Certifications:

- MCSA & MCSE (TOSINSO, 2023)
 - CCNA (Faradars, 2022)
 - Full Stack Developer - Python/AI (Madhej Academy, 2023)
 - Professional Web Design (TOSINSO, 2021)
-

Key Achievements

- Saved \$15K/year through server virtualization and infrastructure optimization
 - Enhanced system security, achieving zero critical breaches in 2 years
 - Improved operational efficiency by 35% through custom web applications
 - Reduced data processing time by 50% with optimized database solutions
-

Soft Skills

- Analytical Problem Solving
- Cross-functional Collaboration
- Project Management
- Technical Training & Support
